

TITAN TRUEFILL CORE SOLUTION

ENGINEERED TO ENDURE. TRUSTED TO PERFORM

For over 30 years, Titan's TrueFill Core Solution has been the benchmark for crude oil tank-level measurement, delivering trusted accuracy, durable performance, and fail-safe operation in the harshest field conditions.

KEY FEATURES:

- Supports 1–6 compartments – flexible fit for any configuration
- Fail-safe overfill prevention – includes automated shutdown for proven protection
- High-accuracy measurement – $\pm$ /- 5mm tank level precision
- 3-year warranty – long-term coverage backed by Titan
- No maintenance required – no calibration, no moving parts

The TrueFill Core Solution is ideal for heavier, more viscous fluids, including:

- Crude Oil
- Asphalt
- Molten Sulfur

TITAN TRUEFILL CORE SOLUTION

NEW FINCH III DISPLAY

- The next generation of tank-side continuous level measurement display.
- Supports up to 6 compartments per display:
 - 1 compartment standalone
 - 2+ compartments with the addition of a Junction Box
- Customizable level set points with audible alarms and visual warnings.
- Automated pump shutdown, including PTO and solenoid control relay wiring options.

FINCH III DISPLAY

**Compatible with any
industry standard
API Sockets**

NEW JUNCTION BOX

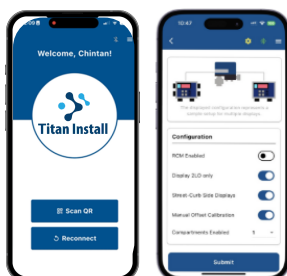

- Includes status LEDs for each compartment, offering real-time fault detection that simplifies troubleshooting and minimizes downtime.

FUTURE PROOF TECHNOLOGY

SMART INTEGRATION FOR MORE PROFITABLE OPERATIONS.

Compatible with Titan Install & Portal

- Program your system through a phone or tablet – no more cables or laptops needed.
- Create, store, modify, and load strapping tables from the cloud.
- Easy troubleshooting and system diagnostics.
