

TITAN TRUEFILL GUARD SOLUTION

PRECISION AND PROTECTION FOR CORROSIVE CHEMICAL TRANSPORT

In corrosive and chemical transport, there is no room for error. Titan's hazardous-location approved hardware is maintenance-free and built to last, keeping your operations safe and moving forward.

Operators get precise volume data in real-time, automated failsafe shutdown before an overfill occurs, and full system visibility, without anyone climbing a tank.

KEY FEATURES:

- High-accuracy volume measurement in corrosive and low-dielectric liquids
- Automated fail-safe overfill prevention
- Tank-side display gives ground crews real-time per-compartment readouts
- No maintenance, no wetted electronics, no moving parts, no recalibration
- Corrosion-resistant Hastelloy probe built for harsh chemical environments
- Hazardous-location approved. Compliant, rugged, field-proven
- 3-year warranty, backed by dedicated technical support

The TrueFill Guard Solution is designed for corrosive fluids, including:

- Acids
- Caustics
- Water Treatment Chemicals
- Corrosive Chemicals
- Harsh Industrial Liquids

TITAN'S TRUEFILL GUARD SOLUTION

TANK LEVEL MONITORING

- High-accuracy volume readings using Titan's Guided Wave Radar technology
- Corrosion-resistant Hastelloy probe
- No wetted electronics, no moving parts, no routine maintenance required
- Customizable alarm set points
- Tank-side display gives ground crews real-time readout, alarm status, and error codes. No guessing. No climbing

OVERFILL PREVENTION

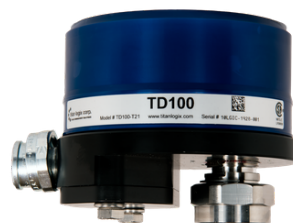

- Fail-safe overfill prevention for every transfer
- Audible alarms — horns or buzzers
- Visual alarms — flashing lights
- Automated pump shutdown via terminal rack, PTO, and solenoid control

ADVANCED TECHNOLOGY BUILT TO SCALE

SMART INTEGRATION FOR SAFER, MORE COMPLIANT OPERATIONS. with Titan Install and Titan Portal

- Program your system through a phone or tablet — no cables or laptops needed
- Create, store, modify, and load strapping tables from the cloud
- View hardware inventory, firmware versions, and system diagnostics
- Diagnose system issues remotely without a site visit
