Accuracy You Can Count On, Protection You Trust.

Automated tank level verification, zero input errors, & built-in overfill protection seamlessly delivered through LCR.iQ + Titan integration.

Inventory Management for Multi-Compartment Used Oil Tanks

FEATURES & BENEFITS

- View tank levels on active fueling screen
- Easily assign products to tanks anytime
- Track tank level inventories
- Switch like-product tanks mid-delivery
- Preset high/low level alarms
- Set high/low delivery triggers
- Detect leaking compartments
- Automated digital ticketing
- Overfill protection
- Prevent theft

No Spills. No Guesswork.

Prevent costly spills with automatic shutoff and high/low alarms—no dipping, no third-party hardware or optic probes required.

Maximize Every Pickup.

Accurate real-time level verification sent directly to LCR.iQ shows exactly how much space you have left—load to full capacity while eliminating manual input errors.

Streamline Your Operations

Eliminate downtime with no moving parts and reduce paperwork with automated ticketing and compliant records—more pickups per day, higher profits per truck.
